**Subject:** [External] Reasons to not increase Dominion Rate

1. We are still in a Pandemic and many have lost their jobs and will have a hard enough time to paying at current rate.
2. Due to more people working/schooling from home, there already is an increase in people's electric bill.
3. Does Dominion have a PR department? Despite it being the RIGHT thing to do for the people, not to increase rates right now, anyone in PR would let them know it does no look good on the company right now to make this change. So wrong, it makes me want to bail early off of the grid. Solar power looks better everyday.
